## DILUTION DONE RIGHT

The ChemTrol "Dilution Done Right" system is a turnkey concept that provides immediate benefits for the detailing Professional and Enthusiast alike. ChemTrol is the perfect solution for proper dilution, quick and easy dispensing, as well as simplifying storage of concentrate chemicals. Because of its compact design, it will also help with shop organization. ChemTrol Fill Stations run on standard water pressure and uses changeable metering tips to allow complete control of the proper dilution ratio for each chemical. No more overuse of chemicals and incorrect dilution by individual technicians!

The P&S Team has put together a select group of products that pair perfectly to the ChemTrol System. However, clients may also choose to add other dilutable products to the system. Keep in mind each Fill Station has the ability to dilute up to 8 products at two flow rates, allowing spill-free filling of spray bottles using the 1 gallon-per-minute (GPM) setting, while larger containers like wash buckets are quickly filled with the 3.5 GPM setting. The available dilution ratios range from 4:1 to 200:1, allowing for proper dilution of a full range of chemicals, from popular surface cleaners all the way up to highly concentrated body shampoos.

The available ChemTrol labeling system keeps the task of refilling bottles simple and mistake-free. All labels are coordinated, from the ChemTrol concentrate bottles, to the individual valves on the ChemTrol unit itself, to the available pre-labeled spray bottles. All the labeling matches, so no more pour-off mistakes! Upgrade the look, performance, efficiency, and safety of your shop by adding the ChemTrol System today!

### BODY WASH Concentrated Car Wash

#### #CW12 - Body Wash

Body Wash Concentrated Wash Soap is designed for use in automotive industrial wash applications. Body Wash creates great foam with lasting dwell time, provides excellent lubricity and superior cleaning capabilities that gently removes dirt/road film from vehicle surfaces. Body Wash is cherry scented for increased customer satisfaction. Body Wash Concentrated Wash soap is highly concentrated for an operational dilution ratio of 200:1.

**Body Wash Dilution Ratio Chart**

Product Use	Tip Color	1 GPM	Tip Color	3.5 GPM
Vehicle Washing	Pink	200:1	Aqua	200:1

### TRUE VUE Concentrated Glass Cleaner

#### #D15 - True Vue

True Vue Concentrated Glass Cleaner is an excellent and effective water based glass cleaner that removes road film, smoke and dirt. True Vue Glass Cleaner may be diluted anywhere from 4:1 up to 10:1 depending upon desired performance. True Vue is perfect for both hot and cold weather applications with longer working time for hot weather and fast enough evaporation for cold climates.

**True Vue Dilution Ratio Chart**

Product Use	Tip Color	1 GPM	Tip Color	3.5 GPM
Winter Dilution	Beige	4:1	Grey	4:1
Summer Dilution	Blue	10:1	Beige	10:1

## KNOCK OFF Concentrated Wheel Cleaner

### #CW22 - Knock Off

Knock Off Concentrated Wheel Cleaner is a safe, non acidic wheel cleaner that removes stubborn brake dust safely and effectively. Formulated specifically for wheel cleaning in a high production environment. Knock Off Concentrated Wheel Cleaner may be diluted anywhere from 4:1 up to 20:1 depending upon the condition of wheel and level of contamination.

**Knock Off Dilution Ratio Chart**

Product Use	Tip Color	1 GPM	Tip Color	3.5 GPM
HD Wheel Cleaning	Beige	4:1	Grey	4:1
Wheel Cleaning	Blue	10:1	Beige	10:1
Light Wheel Cleaning	Orange	20:1	White	20:1

## TEMPEST HD Concentrated Degreaser

### #J42 - Tempest

Tempest Concentrated Cleaner/Degreaser utilizes, high efficiency, biodegradable detergents and solvents for remarkable results. Tempest is a very strong degreasing/cleaning solution that completely dissolves grease and dirt. Tempest's versatility allows it to be used not only for degreasing of engines and related parts, but also may be used to clean wheels, tires and the under body carriage. Tempest Concentrated Cleaner Degreaser may be diluted anywhere from 4:1 up to 20:1 depending upon product use.

**Tempest Dilution Ratio Chart**

Product Use	Tip Color	1 GPM	Tip Color	3.5 GPM
HD Degreasing	Beige	4:1	Grey	4:1
Standard Degreasing	Blue	10:1	Beige	10:1
General Cleaning	Orange	20:1	White	20:1
