Dimensions	120 x 72 x 24mm (32% Smaller!)	127 x 88 x 27mm

Highlights

One Brain to Rule Them All
The "X" in CMX represents the universal applications for which this system can be used: security, remote start, or combo!

Smarter, Stronger, Faster
Upgraded 32-bit ARM processor (CM-7 is 8-bit) and flash storage (256kb) for more advanced programmability, event tracking, and speed!

Choose Your Upgrades
The CMX supports all Firstech accessories for universal applications, such as ALARMIT for security and FTI T-Harnesses for remote start!

Firmware OTA Updating (Coming Soon)
Update your control module firmware via the DroneMobile App or activation portal. You no longer need to go under the dash to update!
