

## PRODUCT INFORMATION SHEET

### **REFLECT** GLASS FINISHER

Introducing REFLECT Glass Finisher, the latest innovation in the P&S Double Black Collection—engineered to achieve unmatched clarity and protection for glass surfaces, inside and out. REFLECT not only cleans but also enhances gloss with a protective SiO<sub>2</sub> (silicon dioxide) layer that repels water, minimizes UV degradation, and prevents build-up, making glass surfaces remarkably easy to clean over time. This premium formula provides a crystal-clear, streak-free finish in a single application, elevating clarity and keeping glass surfaces pristine for longer.

REFLECT is the perfect addition to any detailing routine, bringing both beauty and durability to glass surfaces with the trusted quality of the P&S Double Black Collection.

To use REFLECT begin by ensuring the glass surface is relatively clean. For best results, wash or wipe away any heavy dirt or grime before application. Lightly spray an even mist of REFLECT Glass Finisher directly onto the glass. For larger surfaces, work in sections to maintain an even application. Using a clean, dry microfiber towel, gently buff the product into the glass. Flip the towel to a dry side and continue wiping until the surface is clear and streak-free. For optimal results, apply the product in shaded areas and avoid direct sunlight or hot surfaces to prevent streaking.
